UNIVERSITY ADMINISTRATION
FINANCIAL CONTROLLING AND STATISTICS

University of Rostock

The University of Rostock (UR) is not only the oldest university in the Baltic Sea region, but also the richest in tradition. Founded in 1419, it looks back on a longstanding history of teaching and research and celebrated its 600th anniversary.

The University of Rostock (www.uni-rostock.de) consists of nine traditional faculties and an additional Interdisciplinary Faculty (INF). The Interdisciplinary Faculty unites scientists and students of all disciplines in four major departments: 'Life, Light and Matter', 'Maritime Systems', 'Ageing of the Individuals and of Society', and 'Knowledge - Culture - Transformation'. These departments represent the key research areas that have developed throughout the long tradition of the University, and contribute to honing the University's profile through connecting its strengths by means of interdisciplinary and cross-curricular cooperation.

Offering more than 150 courses of study (among others 45 bachelor degree courses, 57 master degree courses and 37 state examination courses including teaching degrees), the University of Rostock is one of Germany's Universities with the widest range of academic subjects. Beyond that, its Centre for Teacher Training and Educational Research conducts research on education and works on improving the quality of teacher training.

Mission Statement

Through its underlying principle of institutionalized interdisciplinary cooperation, the University of Rostock uses the full potential of its wide range of human, natural and engineering disciplines in research and teaching and thus achieves innovative research results and gains international recognition. The University of Rostock focuses on promoting the next generation of scientist and thus encourages its students in their independence and individual responsibility during their studies, as well as it involves them in research activities from an early stage of their academic career. Moreover, the university fosters lifelong learning and therefore provides diverse open accesses to university education.

Within its international orientation, the University of Rostock recognizes itself as particularly integrated in the Baltic Sea region and is therefore committed to its obligation to the continued development of this surrounding region. The University of Rostock advocates for tolerance, equal opportunities and family friendliness as well as it acknowledges its leadership principles. Research, teaching and studying at the University of Rostock should serve peaceful purposes, enhance coexistence of people, and uphold the principle of sustainability when using finite natural resources.
